Extended Connectivity
Without Compromises!

The Brand LINQ byELEMENTS

o **Brand Statement**

Work-From-Home or On-The-Go Without Compromises.

LINQ develops timeless and functional connectivity solutions for mobile computing. Premium designs made from durable materials are integrated with the latest technologies, **providing the missing LINQ for optimal connectivity.**

o **Proposition**

Uniform sized packaging ensures a calm and beautiful organized planogram. Combined with unified high-end specs between all SKU's make the collection not only easy to sell, but also to understand as a consumer.
Minimalistic, Danish design.
Honest and affordable connectivity solutions.

o **Target Group**

Tech user from all ages that is looking for a simple understandable solution, as well as pro-users with heavy demands for spec.
Creatives. Gamers. Students, Mom & Dad. Apple users, Early adopters, 18-60 yr, Consumers/Business that appreciates minimalistic design with an appreciation for details.

LINQ
by
ELEMENTS

“

We created LINQ byELEMENTS from the **desire to simplify** and revolutionize the category of USB-C hubs.

Uniform sized packaging delivers a beautiful and clean instore presentation and **unified specs between all SKU's** make the collection not only easy to sell, but also easy to understand as a consumer.

LINQ byELEMENTS is focused on developing a premium line of hubs and connectivity accessories, all with a durable and compact aluminum housing.

Naturally with **top-of-the-line specs at an affordable price!**

*Jakob Ludvigsen Founder
& Brand Director LINQ
byELEMENTS*

USP's

- o **Compact yet focussed assortment**
From the desire to simplify the category we developed a compact assortment that makes sense.
Products that consumers can relate to, even without being a tech wizz.
- o **High-end Specifications**
Simplifying the category means, making it simple! No compromises on specifications for all ensures each LINQ hub or adapter delivers the fastest connections possible.
Best in Class Specs vs competition! Great for online comparisson.
- o **Unified Specifications**
Unified specsifications across all products makes it easy for consumers to understand as well as for sales staff in store to assist. No need to double check each SKU if the specs are the right ones. **High end specs for ALL!**
 - PD 100W
 - HDMI 4K @60Hz
 - USB 3.2 Gen2 (Pro Hub Collection)
- o **Uniform Packaging**
Uniform packaging size makes the best instore presentation, including dedicated back cards for when the product is sold out.
The calm color tones of the packaging invite and the clear uniform messaging guides consumers to the correct product.

The Brand
LINQ byELEMENTS

Pro Multiport Hub

- o **LINQ Pro Multiport Hub, USB3.2 Gen2**
For light office work or more demanding creative tasks, the Pro Multiport Hub collection is up for it.
- o **Uniform High-End Specifications**
All Pro Multiport hubs feature the same specs, PD 100W, HDMI 4K@60Hz and USB A+C @10Gbps.
- o **Durable Braided Cable**
All LINQ hubs (both Pro Hubs and HDMI Adapters) have a durable braided fabric cable.

D2 Dual 4K MST on M1

- o **Apple M1**
External display limitations | SOLVED!

Dual display workspaces have become the standard over the last few years, enabling increased efficiency and improved workflow. All intel-based MacBook Pro and Air models since 2016, have natively supported multiple external displays via their Thunderbolt USB-C ports and connected docks/hubs..

However, the new M1 MacBook Pro and Air models, no longer natively support multiple external displays via their Thunderbolt USB-C ports. They only support one external display natively, which is not a limitation of the USB-C hubs and docks, but of the Thunderbolt 3 / USB4 ports on the new M1-based Macs.

To enable the dual display setup for M1, as well as Intel-based Mac's, LINQ byELEMENTS has developed D2 - Dual Display Technology for Mac! MST for M1 and Intel Mac's | SOLVED!

D2 provides 1 extra external display option compared to the system limitations.

For M1 that means with D2 you can connect 2 external displays. With M1 Pro you can you can connect 3 external displays and with M1 Pro Max 4 external displays.

Dual 4K Display Technology Pro Hubs

100W
Power Delivery
up to 100W

 
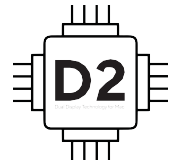

4K / 60Hz
HDMI 1: 4K @60Hz,
